# The App

## About

This app is free to download.

The purpose of the app is to program the "CellCom Prime" intercoms. The app easily formats the programming strings. Complicated text messages are no longer a problem. Client/customer information saved for easy updating as well as remote programming.

## Features

This app hosts a range of features that make your job as the installer/programmer so much easier than before.

SMS programmable Intercom with keypad with a built in seven day time clock. Auto open/close gates at pre-set times of the day/week. Program the keypad via SMS text message.

Store temporary keypad codes, time restricted codes and permanent codes. Add and delete codes via SMS text for improved security.

Notifications to a master phone when access is granted.

Control both relay outputs with momentary latch and unlatch buttons. Do not disturb and watershed feature to prevent nuisance calls at night.
